

Technical Perspectives on Analyst's Rating Changes

BBBY case study

02-17-2008

BBBY – The TPARC report for December 27, 2005 described BBBY as "trending down." The downtrend continued over the next two years and the stock performed poorly over that time relative to the overall market. Even after a significant rally in the stock, it is still down about 20% from the level shown on the TPARC report.
