

Technical Perspectives on Analyst's Rating Changes

BIG case study
12-23-2007

BIG – The TPARC note mentioned that BIG was "too extended for new buys" and that a major correction could occur. These comments proved to be prophetic. BIG built a top and has experienced a deep correction and has lost about 50% of its value. It has fallen all the way back into the base that formed before the big move up.
