

Technical Perspectives on Analyst's Rating Changes

BSC case study

02-18-2008

BSC – The TPARC report for May 16, 2007 showed a major top on BSC. This top marked the beginning of a long-term downtrend in the stock. From peak to trough the stock lost more than 50% of its value. There have been a couple of attempts to arrest the decline but resistance has turned the stock back down each time.
