

Technical Perspectives on Analyst's Rating Changes

CPRT case study

03-01-2008

CPRT – The TPARC report for October 6, 2006 called attention to a "breakout above a major consolidation" and that "performance was improving." The upside breakout continued into a full-fledged uptrend and the stock has out performed the market over the past year and a half. The stock has gained about 30% over that time.
