

# Technical Perspectives on Analyst's Rating Changes

CSX - case study  
02-23-2008

CSX –The TPARC report from August 12, 2005 indicated that CSX was trending up and that it had broken out above a major consolidation. That up trend has continued and the stock has recorded a major gain. The more recent chart on the right has been adjusted for a 2-for-1 split that was paid in 2006. CSX stock has more than doubled since the TPARC report was sent out. It has consistently remained above the 45-degree Bullish Support Line since the TPARC report was prepared.
