

# Technical Perspectives on Analyst's Rating Changes

GTIV - case study  
01-18-2009

GTIV – The technical pattern on GTIV at the time of the TPARC report on September 12, 2007 confirmed the “buy” rating rendered by the analyst. The stock was showing a breakout above a major consolidation and was in a major up trend. The base held the stock up and the up trend did resume. This stock has been a major winner during a very bad period in the stock market. It has remained above the 45-degree Bullish Support Line throughout the move up.
