

Technical Perspectives on Analyst's Rating Changes

KFT case study

02-16-2008

KFT – The TPARC for September 21, 2005 showed KFT as being in a trend with "lower lows and lower highs." That trend of relative performance has continued. The stock is slightly higher today but there has been a serious loss of relative performance. It continues to remain below the 45-degree Bearish Resistance Line.
