KIRK case study

02-09-2008

KIRK – By the time the TPARC report was prepared in March of 2006, KIRK had been trending down for almost two years. It continued down and has lost almost 80% of its value since the date of the TPARC report. The stock remained below the 45-degree bearish resistance line and no meaningful attempts to reverse the downtrend were recorded.
