

Technical Perspectives on Analyst's Rating Changes

LTD - case study
02-18-2008

LTD – The TPARC report for May 16, 2007 showed that LTD was trending down, that there was lots of overhead resistance on the stock and that it offered only "limited upside potential." This downtrend has continued and the stock has lost about a third of its value since the TPARC report was prepared. The stock has remained below the 45-degree Bearish Resistance Line since the formation of the major top.
