

Technical Perspectives on Analyst's Rating Changes

RF – case study

02-17-2008

RF – The TPARC report for December 16, 2005 described RF as "trending down" with "limited upside potential." Shortly thereafter, the stock broke down and has performed poorly since that TPARC was prepared. The stock has lost more than a third of its value since that time. It has remained below the 45-degree Bearish Resistance Line during the past two years.
