

Technical Perspectives on Analyst's Rating Changes

TWP case study

02-02-2008

TWP – The stock was already in a very serious bear market at the time of the TPARC report in December of 2005. The major decline continued and the stock has dropped from over \$25 per share to under \$8 per share. The stock consistently remained below the 45-degree bearish resistance line during the decline.
