

# Technical Perspectives on Analyst's Rating Changes

UIS case study  
02-24-2008

UIS – This stock experienced a sudden collapse during the time just before the TPARC report was prepared in October of 2005. The TPARC report indicated that it would probably take a long-time to build a base on this stock and that is what happened. The stock fluctuated wildly after the TPARC report was prepared but it is still below the price level shown in the TPARC report over two years ago.
